

BEN PARKER CO., INC.

METAL FABRICATION

fabrication

company detail

Ben Parker Co., Inc. is an industrial steel fabricator responding to the demands of the Utilities, Cement, Mining, Foodservice, Pulp and Paper industries since 1995. We are a merit shop fabricator with a wide range of equipment and labor to meet the varied construction and maintenance needs of our industrial clients. Ben Parker Co., Inc. has built its reputation on Critical Time Frame projects requiring on time, on budget, high quality metal fabrication from carbon steel, stainless steel, aluminum and specialty alloy materials, including 2205, C276, 317L, 321 and other exotics.

Since its inception, Ben Parker Co., Inc. has enjoyed steady growth in both personnel and sales volume. Successful short lead time projects and scheduled shutdowns have won us repeat orders from many clients and helped grow Ben Parker Co., Inc. into a multi-million dollar annual sales status. Our written quality standards, as well as our AWS certified welding procedures and welder qualification process, combine to assure only the highest quality fabricated components are delivered to our customers.

As a member of the Chattanooga Manufacturers Association, Better Business Bureau and Chamber of Commerce, we are proud to be a productive part of Chattanooga's Business Community and have been a finalist, for two years running, for the Chattanooga Chamber of Commerce Small Business Award. Chattanooga is an important central location for shipping in the Southeast and offers easy access to rail, truck and barge shipments. Our business is located just 4 miles from the Tennessee River and its barge transportation facilities.

We promote safety as our #1 goal and currently enjoy an excellent experience modification rating of 0.83 for the year 2008. Ben Parker Co., Inc. is a Tennessee Drug Free business and maintains a substance abuse program which requires pre-employment, random, post-accident and "for cause" screening.

Staffing and resources include:

- 4 fully equipped shops on an approximate 7 contiguous acres
- 32,000 sq. ft. of Production Area
- 5,000 sq. ft. of Office Area
- 65 Hourly Craftsmen
- 8 Administrative Personnel (Quality, Engineering, Safety, Human Resources, Project Management, Sales, Clerical)

BEN PARKER CO., INC.
METAL FABRICATION

equipment

- Bridge and Jib Cranes with up to 20' Hook Height
- Single Spindle Drill Line with 60' Bed
- CNC Plasma Burning Center with 6' X 20' Bed
- Plate Shear with 1/4" X 10' Capacity
- 220 Ton Press Brake X 12' Long
- Multiple Ironworkers with up to 80 Ton Capacity
- Multiple Plate Rolls with up to 5/8" X 10' long Capacity

- Machine shop Mill, Lathe, Radial Drill Press with +/- .002" tolerance typical
- Multiple Band Saws up to 16" Beam Capacity
- Numerous MIG, Stick, TIG Welding Centers
- High Capacity Buffalo Angle and Channel Rolls

recent projects

Italcementi Group/CTG USA/Capitol Cement–Essroc: Martinsburg, WV

650 Tons-Ductwork and Supports,
Wear-lined Chutes, De-dusting Pipe
Ongoing Contracts Scheduled to Complete April 2009

AE&E Von Roll–Pratt Industries: Conyers, GA

300 Tons-Ductwork, Misc. Supports,
Ammonia Evaporator, Misc. Components
Completed January 2009

Humboldt–Wedag–River Cement: Festus, MO

90 Tons-Wear-lined Chutes and De-dusting Pipe
Completed December 2008

Alstom Power, Inc. – Alcoa Aluminum: Evansville, IN

900 Tons-Ductwork and Supports
Completed August 2008

Alstom Power, Inc. – Iatan #2: Weston, MO

180 Tons-Access Platforms and Misc. Structural Steel
Completed June 2008

Polysius Corp.–Florida Rock Industries/ Thompson S. Baker: Newberry, FL

350 Tons Ductwork and Supports,
Wear-lined Chutes, De-dusting Pipe
Completed August 2008

Polysius Corp.–American Cement: Sumterville, FL

150 Tons Ductwork and Supports,
Wear-lined Chutes, De-dusting Pipe
Completed September 2008

OCI/Alabama Electric Co–op/Plant–Lowman: Leroy, AL

Corten Duct, 2205 Stainless Steel Sparger
Piping, Misc. Structural Steel
Completed October 2007

Georgia Power/Southern Company– Plant Bowen: Cartersville, GA

Duct, Casing, Expansion Joints, Structural Steel, Machine Work,
Seal Plates and Burner Boxes, All Types Misc. Fabrication
Seventh Year of Contractual Fabrication
